

	const + &valuA	value
用意	const : To fix the valueA. & : refer	Just copy the valueA in function of class.
機制	1. Put a valueA in driver program. 2. Call constructor. 3. ValueA is referred into function of class.	1. Put a valueA in driver program. 2. Call constructor. 3. ValueA is copied into function of class.
Example call: using Assignment: Copy the valueA and store in the valueB.	EA::EA(const int &a){ b=a; }	EA::EA(int a){ b=a; }
example call: using Initializer list:	EA::EA(const int &a) :b(a){ }	EA::EA(int a) :b(a){ }
Example by value:	int &a=b	int a=b
Memory position after passing:	same	different
